

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 9, 2007

Water Body Under Evaluation:

Water Body ID #: 3705
Name: Gabriel Creek
Length of Segment: 13.0 miles
County(ies): Morgan

Use Attainability Analysis (UAA) Study:

UAA ID #: 0250
Submitter: SES, Inc.
Date(s) Conducted: August 20, 2007 and August 21, 2007
Date Received: September 10, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA field survey conducted in August 2007 focused on the two subsegments of Gabriel Creek (WBID 0883 and 3705) created by the 2005 Water Quality Standards rulemaking. No WBCR was observed during the survey and no interviews were conducted. However, an interview conducted during the 2006 UAA, and subsequent follow-up telephone conversation by DNR staff, revealed existing secondary contact use.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 2 of the 6 sites evaluated, one in each of the classified segments. Due to meeting the maximum depth criterion, the committee recommends the WBCR use designation be retained. Due to documented existing secondary contact use, the committee recommends the Secondary Contact Recreation use designation be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
